I. PENDAHULUAN

Aplikasi volume bangun ruang dibuat dengan menggunakan Flutter yang memiliki tujuan untuk memberikan kemudahan dalam menghitung volume pada bangun ruang secara cepat. Dalam aplikasi ini pengguna dapat memilih bangun ruang seperti kubus, pyramid, atau tabung. Kemudian pengguna memasukkan angka sesuai rumus yang telah disiapkan, selanjutnya pengguna mengklik hitung, aplikasi akan otomatis menghitung volume bangun ruang yang telah dipilih. Pengembangan aplikasi menggunakan Flutter sebagai framework utama, VS Code sebagai editor dan Android studio sebagai lokasi untuk menampilkan aplikasi secara mobile. Aplikasi volume bangun ruang diharapkan mampu membantu dalam menghitung volume bangun ruang secara cepat dan efisien
